

# Upgrade to Dynamics 365 BC

Transitioning from legacy ERP systems to Microsoft Dynamics 365 Business Central can boost efficiency and streamline operations.

## 1 Assess Needs

Evaluate your current ERP system and identify areas for improvement.

## 2 Choose BC

Research and select the right Dynamics 365 Business Central version and deployment options.

## 3 Plan Migration

Develop a detailed migration plan, including data mapping, system configuration and user training.

## 4 Data Migration

Transfer your data from the legacy ERP System to Dynamics 365 Business Central

## 5 System Training

Thoroughly test Dynamics 365 Business Central to ensure everything is working correctly.

## 6 Go Live

Launch the new ERP system, providing ongoing support and training to users.

## 7 Optimize BC

Continuously monitor and optimize Dynamics 365 Business Central to maximize its benefits.

# Upgrading to BC

Upgrading to Dynamics 365 Business Central requires careful planning and execution. Following this guide businesses can smoothly transition to a more efficient system.
