

Business Central Move

Moving to **Microsoft Dynamics 365 Business Central** can be done via upgrade or migration, each with distinct advantages and drawbacks.

1

Upgrade Path

Involves moving to a newer version of Dynamics NAV, preserving data and customizations. Ideal for minimal disruption and continuity.

2

Migration Path

Moving to an entirely new platform like Business Central, requiring data reconfiguration and customization rebuilding.

3

Upgrade Factors

Consider system limitations, business goals, and customization compatibility before choosing upgrade.

4

Migration Factors

Migration is best for unsupported legacy systems, cloud needs, and scalability. Requires more planning and resources.

5

Upgrade Benefits

Offers lower costs, quicker implementation, and minimal changes to existing workflows.

6

Migration Benefits

Enables advanced cloud functionalities, scalability, and adaptability to modern business needs.

Choosing Right

The decision between upgrade or migration depends on your system, goals, and resources. Business Central provides a modern and scalable solution for any path you choose.
